The 4th Congress of

APFSRM

Asian Pasific Federation of Societies for Microsurgery

8th National Congress of the Turkish Society
for Reconstructive Microsurgery (TSRM)

May 10-13, 2018 / Antalya - TURKEY

Dear Colleagues,

The 4th Congress of Asian Pasific Federation of Societies for Microsurgery in conjunction with the 8th National Congress of the Turkish Society for Reconstructive Microsurgery (TSRM) will be held on May 10-13, 2018 in Antalya, Turkey. After very successful congresses which have been organized in Singapour, Korea and China, we are honored to host this prestigious congress in Antalya as the Turkish Society for Reconstructive Microsurgery.

As the city of sun, sea, sports and science, Antalya is one of the most popular destinations in Turkey, located on the Turkish Riviera with sandy beaches, ancient historic sites and lively nightlife. The city is also host to significant scientific practices like the first face and bilateral hand transplantation in Turkey which had been successfully accomplished at the Akdeniz University.

The Congress will be rich and fruitful, the sessions will focus on the most recent scientific findings in the area of microsurgery and will bring together the best and the brightest surgeons in the specialty, poised to share their expertise with colleagues. We think that it will be a very good educational and networking event, for both domestic and international microsurgeons.

We look forward to welcoming you in Antalya,

Prof Taçkın Özalp, M.D.
Chair of APFSRM 2018
President of TSRM

Prof Sühan Ayhan, M.D
Co-Chair of APFSRM 2018
